HIGH-TECH PORCELAIN STONEWARE

Fiandre by A-Class Surfaces International combines decades of experience with aptitude and innovation strategy and branches into five distinct slab types. In an innovative 300x150 cm format, Maximum is a material that combines the established, classical characteristics of Fiandre's top range porcelain stoneware, with new advantages, high technical performance, lightness and versatility. Maximum tiles are supersized for ventilated facades. It is available in stunning slabs with minimum thickness of 6 mm. Marmi Maximum offers fine, decorative solutions, enriched by inimitable colour variations and unique vein effects. The lower weight of the individual slabs adds to the logistical advantage of transportation and handling at the site.

POLAR LIGHTING POLES

K-lite's surface mounted, Polar Lighting Pole is integrated with LED Lighting Module. It is designed for a complete range of contemporary designs with single arm, double arm, L-arm, V-Arm, Square arm and Parallel arm. The pole is engineered to meet the adverse conditions and the pole sections are duly welded using special grooving techniques and high end MIG welding process. The control box is integral and built-in with service door, locking arrangement and safety chain. The MS pole is coated with epoxy zinc

LOUNGING WHILE WORKING

Mirania – Kolkata's luxury furniture store has announced the presence of "Hosu Lounge Collection", designed by Particia Urquiola for Coalesse (now Steelcase), at its premium store of multi-luxury brands. It is based on the concept of doing work—but in a relaxed, non-typical-office environment. It is essentially a desk-free lounge chair that comes in two sizes (36" wide for one user, 64" wide for two) and is loaded up with
